X. GLOSSARY 143

I. HIGHLIGHTS

*The unemployment rate in New Hampshire for the first four months of 1987 continues to be the lowest unemployment rate in the United States.

*Total population projected at 1,060,000 for Fiscal Year 1988 is expected to increase by 139,390 or 15.1 percent over the 1980 census.

*The civilian labor force is expected to reach 596,900 in FY 1988, an increase of 31.4 percent over the 1980 census.

*The civilian labor force will have nearly 73.0 percent of its total forces located in Hillsborough, Merrimack, Rockingham, and Strafford counties.

*The average unemployment rate for FY 1988 is estimated to be 3.9 percent. Coos County is expected to have the highest unemployment rate of 6.9 percent followed by Rockingham and Strafford counties with rates of 5.2 and 4.5 percent, respectively.

*Per capita income for 1985 was $14,964, an increase of 7.8 percent over 1984. New Hampshire had the third highest per capita income in New England and $1,097 above the per capita income for the United States.

*Nonagricultural employment is expected to reach 523,090 in FY 1988. Individuals employed part-time for economic reasons will account for 11,860 of the total.

*The total of the economically disadvantaged in New Hampshire is estimated for FY 1988 to be 106,945 with 71,600 of the total to be over 18 years old.

II. DESCRIPTION OF AREA

The State of New Hampshire is one of six New England States in the Northeastern part of the United States. Under CETA in FY 1983 there were two CETA Prime Sponsors in the State with Hillsborough County as one Prime Sponsor and the remaining nine counties comprising the Balance of State as the other Prime Sponsor and they were administered by the New Hampshire Office of Employment and Training. Beginning in FY 1984 there was only one service delivery area, the State of New Hampshire, as designated by the Governor. In Fiscal Year 1985 two service delivery areas existed similar to what was used in FY 1983. Two service delivery areas continue in FY 1988 with Balance of State (state minus Hillsborough County) and Hillsborough County.

New Hampshire shares its boundaries with the Province of Quebec to the north, the Connecticut River and the State of Vermont to the west, the State of Massachusetts to the south and the State of Maine and the Atlantic Ocean to the east. The State has seventeen miles of coastline along the Atlantic Ocean.

The average elevation in New Hampshire is 2,000 feet and approximately 84 percent of its 9,241 square miles is covered by forests. The southern section of the State consisting of Hillsborough, Merrimack, Rockingham and Strafford counties contains over seventy percent of the State's population.

The mountains in the north, the seacoast in the east and the many lakes and ponds throughout the state are all within easy reach from Concord, the State's capital. Concord is readily accessible from various Northeast major cities. Listed below are highway distances:

From:	To Concord:
Boston	70 miles
Montreal	240 miles
New Haven	174 miles
New York	250 miles
Portland	87 miles
Providence	110 miles

III. ECONOMIC TRENDS

Economic conditions in New Hampshire continue to improve but at a much slower rate than last year. Table 26 indicates that per capita personal income growth between 1984 and 1985 for the State was 7.8 percent. This is 2.4 percent less than the 1983 to 1984 percentage change, while the United States per capita personal income dropped 3.7 percentage points for the same period. In comparison with the other New England states, New Hampshire is tied with Massachusetts for the highest percentage, 7.8 percent, which was three tenths of a percentage point above the New England average.

Total personal income growth for New Hampshire between 1984 and 1985 was at 10.0 percent. This is the largest growth rate in New England and 3.3 percentage points higher than the total personal income growth in the United States. Table 27 reflects this along with growth rates by industry for New England and the nation.

New Hampshire with a 10.0 percent change appears to be holding its own in New England.

The following tables serves to show the changing pattern in total wages shared by manufacturing and nonmanufacturing. Even though total wages in manufacturing increased in 1985, the percent dropped to 38.4 percent of the total.

Preliminary totals for the first three quarters of 1986 indicates that manufacturing is still on the downward slide.

Total Wages
New Hampshire
(Workers Covered by Unemployment
Compensation in Private Industry)

Year	Total	Manufacturing	Non-manufacturing	Percent of Total Mfg.	Non-mg.
1973	$1,764,794,646	$ 764,904,559	$ 999,890,087	43.3	56.7
1974	1,912,311,974	815,835,934	1,096,476,040	42.7	57.3
1975	1,959,164,661	801,425,796	1,157,738,865	40.9	59.1
1976	2,260,558,803	950,208,803	1,310,350,000	42.0	58.0
1977	2,587,126,913	1,096,181,639	1,490,945,274	42.4	57.6
1978	3,041,007,264	1,281,209,453	1,759,797,804	42.1	57.9
1979	3,537,373,910	1,496,782,374	2,040,591,536	42.3	57.7
1980	3,957,283,436	1,684,829,094	2,272,454,342	42.6	57.4
1981	4,432,106,831	1,848,281,022	2,583,825,809	41.7	58.3
1982	4,846,866,740	1,941,164,597	2,905,702,143	40.0	60.0
1983	5,373,591,268	2,113,195,598	3,260,395,670	39.3	60.7
1984	6,056,202,213	2,440,873,428	3,615,328,785	40.3	59.7
1985	6,825,196,108	2,622,680,402	4,202,515,706	38.4	61.6

IV. POPULATION AND LABOR FORCE DEMOGRAPHICS (TABLES 1-6)

Population in New Hampshire is projected to be approximately 1,060,000 during Fiscal Year 1988. This is an expected increase of around 22,600, a 2.2 percent increase over the population projected for FY 1987. This growth will mainly occur in the southern half of the State, according to the county population figures.

New Hampshire's youth population, ages 16 through 21 years old, will decrease about 6,700 in total to 95,195. This is an estimated eight-tenths of one percent decline from FY 1987. Youth's share of the estimated population is about nine percent of the total, of which males represent 51.1 percent. The elderly, those 65 years old and over will increase by 7,446 with 61 percent being female. Twenty-six and three tenths percent of the projected population are in the 25-39 age group.

The civilian labor force is expected to reach 596,900 in this fiscal year. This is an increase of five percent over last year's projection. The labor force will be comprised of fifty-four percent male and forty-six percent female workers. The 25-34 age group will continue to have the largest percentage of the labor force with 28.6 percent of the total. The labor force participation rate rose 1.7 percentage points to 72.8 percent of the total. The projected participation rate for males and females are 82.7 percent and 63.8 percent with increases of 0.8 and 2.5 percentage points respectively.

More job opportunities continue to become available for the female worker, as the need for increased financial help and the cost of living rises. Many females seek employment in order to maintain their standard of living or to affect a better life for themselves and their families. Other factors for the increase in female participation rates are more employer flexibility for hours and benefits, including a mother's shift, more shifts to accommodate the shopping hours and the increase in the level of educational attainment allowing women to become more qualified for a greater variety of work.

V. INDUSTRIAL EMPLOYMENT (TABLES 8-13)

Table 8 indicates that the changes in industry percentages followed a similar trend when comparing New Hampshire statistics to those of the United States. The largest drop in nonagricultural employment occurred in manufacturing with a loss of 2.1 percentage points. This decrease was offset by gains in trade, construction,, and mining industries in the nonmanufacturing sector. Government employment continues to decrease in its percent distribution.

The following tables shows the relationship of New Hampshire with the United States and other New England states in February 1987.

Employees on Nonagricultural and Manufacturing Payrolls by Area (in thousands)

Area	Total Nonagricultural	Manufacturing	Percent of Total
United States	100,610.0	19,069.0	19.0
New England	6,247.3	1,393.6	22.3
Connecticut	1,616.1	395.0	24.4
Maine	476.3	102.8	21.6
Massachusetts	2,983.6	608.8	20.4
New Hampshire	492.5	118.2	24.0
Rhode Island	437.6	119.2	27.2
Vermont	241.2	49.6	20.6

SOURCE: U.S. Department of Labor, Bureau of Labor Statistics, Boston, Massachusetts, April 1987.

New Hampshire's manufacturing percentage of the total nonagricultural employees as of February 1987 continues to be above the United States and New England percentages. In the New England area, Massachusetts has the largest number of manufacturing employees but the smallest percentage of manufacturing to the total for nonagricultural. All of the New England states continue to decline in manufacturing statistics, as does the nation. The time period of 1970 through to February 1987, exemplifies this trend which is found in the table on the following page.

Percent

Manufacturing to Nonagricultural Employment

Area	1970	1975	1980	Feb 1987
U.S.	27.3	23.7	22.1	19.0
N.E.	27.2	27.2	27.8	22.3
N.H.	35.4	28.3	29.8	24.0

The following table shows the relationship of New Hampshire with the United States and the other New England states according to durable and nondurable goods in February 1987.

Employees on Durable and Nondurable Manufacturing Payrolls by Area (in thousands)

Area	Durable Goods	Nondurable Goods
United States	11,246.0	7,823,0
New England	948.7	444.9
Connecticut	295.0	100.0
Maine	46.6	56.2
Massachusetts	409.1	199.7
New Hampshire	81.5	36.7
Rhode Island	81.8	37.4
Vermont	34.7	14.9

SOURCE: U.S. Department of Labor , Bureau of Labor Statistics, Boston, Massachusetts, May 1987.

The employment in the durable goods industries accounted for 68.1 percent of the manufacturing employment in New England, up two tenths of a percent from the previous year. Maine is the only state in New England that employs more in the nondurable goods industries than in durable goods. New Hampshire with 69 percent of the manufacturing employment in durable goods was third in New England. Machinery with 25,150 workers is the leading industry in manufacturing followed by electrical products with 23,570 workers. In 1986, durable goods with 81,700 workers had 69.2 percent while 36,400 were accounted for by nondurable goods industries, 30.8 percent of all manufacturing (see table 9).

Comparative growth of manufacturing employment in New Hampshire and the United State is shown in the following table.

Growth in Manufacturing Industries
New Hampshire and the United States
(in thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1974	94.2	-1.9	20,077	-0.4
1975	85.1	-10.7	18,323	-9.6
1976	94.5	11.0	18,997	3.7
1977	101.5	7.4	19,682	3.6
1978	109.8	8.3	20,505	4.2
1979	116.5	6.1	21,040	2.6
1980	116.6	0.5	20,285	-3.6
1981	116.6	0.0	20,170	-0.6
1982	111.7	-4.2	18,781	-6.9
1983	113.4	1.5	18,434	-1.8
1984	123.4	8.8	19,379	5.1
1985	122.5	-0.7	19,314	-0.3
1986	118.1	-3.6	19,186	-0.7

*SOURCE: Employment and Earnings, April 1987 Vol. 34, No. 4, Table B-1, pg. 75.

The loss of employment in manufacturing in New Hampshire resulted from job losses of 1,300 in textile products and leather products, with another 1,800 job losses in electrical products. In spite of the loss of 650 jobs in the machinery industry, it remained the leading manufacturing industry in terms of employment in New Hampshire. After the slight increase in manufacturing, employment in the United States decreased 1.3 percentage points during 1985 and 1986, which would tend to indicate that the nation is slowly changing into having a service oriented economy.

The growth of the trade and service industries combined continue to increase in New Hampshire at a pace which is much faster than the national average. These two industry divisions make up the largest part of non-agricultural employment in New Hampshire.

The following table shows the overall growth in our state for the period 1974 through 1986 was 93.9 percent compared with the national rate of 54.1 percent.

Growth in Trade and Services
New Hampshire and the United States
(in Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1973	114.7	8.3	29,463	4.4
1974	117.8	2.8	30,428	3.2
1975	120.3	2.1	30,952	1.7
1976	127.2	5.7	32,306	4.4
1977	136.0	7.0	33,819	4.7
1978	145.5	7.0	35,794	5.8
1979	153.1	5.2	37,305	4.2
1980	157.9	3.1	38,200	2.4

*Source: Employment and Earnings, April 1987 Vol. 34, No. 4, Table B-1, pg. 75.

VI. EMPLOYMENT INFORMATION BY OCCUPATION (TABLE 28)

The average rate of growth for all workers is 3.17 percent over the period 1985-1997. The single major occupational group projected to have the largest annual growth rate with 4.30 percent, is sales and related occupations. The professional, paraprofessional, and technical occupational group with a projected growth rate of 3.98 is second, but with a projected annual growth of 3,721 is ranked first when comparing the major occupational groups by number or annual opening due to growth.

The following table shows the twenty-three occupations that have a growth rate of 6.00 percent or better which is somewhat higher than the average of 3.17 percent.

Occupations with Annual Growth Rates of
6.0 Percent of Better

Occupations	Annual Growth Rate
Paralegal Personnel	13.14
Data Processing Equipment Repairers	9.21
Legal Assistants & Technicians	8.59
Biological Scientists	8.07
Legal Secretaries	7.92
Computer Systems Analyst EDP	7.90
Securities, Financial Service, Sales	7.40
Management Analysts	7.28
Child Care Workers, Private Household	7.18
Photographic Processing Machine Operator	6.85
Machine Assemblers	6.75
Interviewing Clerks	6.44
Peripheral EDP Equipment Operators	6.36
Combination Machine Tool Operator	6.36
Credit Checkers	6.25
Medical Assistants	6.23
Welfare Eligibility Workers	6.18
Lawyers	6.18
Medical Records Technicians & Technologists	6.03
Architects, Civil	6.02
Office Machine, Register Service	6.02
Electrical & Electronic Engineers	6.01
Mechanical Engineering Technician	6.00

NOTE: Restricted to Occupations with Employment of 100 or More in 1985.

It is projected that four major occupational groups will have an annual growth rate above the average growth rate of 3.17 percent. The agriculture, forestry, fishing occupational groups has the only negative projected growth rate of the major groups, -2.21 percent. The basis for this negative growth rate, in part, is the reduction of the dairy herds in agriculture and the depletion of the fish in New England waters. Offsetting part of this negative growth rate is the increase in housing starts which creates more demand for landscaping and forestry products.

The following table reflects the annual growth rate by major occupational groups.

Major Occupational Groups	Annual Growth Rate
Sales & Related Occupations	4.30
Professional, Paraprofessional, Technical Occupations	3.98
Service Occupations	3.84
Managerial & Management Related Occupations	3.47
Clerical & Administrative Support Occupations	3.06
Production, Operation, Maintenance Occupations	2.46
Agriculture, Forestry, Fishing Occupations	-2.21
Total All Occupations	3.17

The following table list those occupations whose number of annual average job openings due to growth are over 200 per year.

Occupations Projected to Have
the Greatest Numerical Growth

Occupations	Annual Growth
Cashiers	653
Salespersons, Retail	567
Secretaries	564
Waiters & Waitresses	458
Registered Nurses	413
Janitors & Cleaners	389
Stockclerks, Sales Floor	299
Teachers, Secondary School	251
General Office Clerks	221
Bookkeeping & Accounting Clerks	217
Teachers, Preschool & Elementary	206
Carpenters	204

VII. UNEMPLOYMENT INFORMATION

a.) Trends in Unemployment (Tables 6-7, 21-22)

In 1986, the annual average unemployment for the State was 16,000 with an unemployment rate of 2.8 percent. New Hampshire had the lowest unemployment rate in the United States for the twelve months of 1986. In 1987, New Hampshire's unemployment rate continued to be the lowest in the nation for the months of January through April. Projected unemployment for Fiscal Year 1988 is 23,498 with an unemployment rate of 3.9 percent. The female unemployment rate is expected to decrease five-tenths of a percentage point to 3.8 percent from 4.3 percent in FY 1987. Male unemployment is expected to drop to 4.0 percent in FY 1988.

Table 7 shows that an estimated 89,900 different individuals will experience being unemployed in 1988, slightly more than 9,200 less than was expected in FY 1987. Males will account for 55.3 percent of the total unemployed in FY 1988. The number of long-term unemployed is projected at 4,340 with only 26.8 percent of those expected to be female. Hillsborough and Rockingham counties will account for more than fifty-five percent of both the total and the long term unemployed.

New Hampshire exhaustees for the 1986-1987 benefit year (table 22) total 424 with 300 or 70.8 percent male. The exhaustees between the ages of 22 and 44 dropped slightly from the previous year to 56.1 percent. Two thirds of those qualified to draw unemployment compensation had a minimum annual earnings of $14,500 and weekly benefits starting at $126. By industry nearly one half of the exhaustees were from nonmanufacturing industries with construction and mining accounting for 50.7 percent of the nonmanufacturing total.

b). Insured Unemployment (Tables 23-25)

The data on insured unemployment are based on information as of April, 1987. The total insured unemployment in New Hampshire fell for the third consecutive year. This decrease of about 1,150, since April 1986, was mostly in the female sector. Women account for slightly more than one third of the unemployed. In manufacturing there are 175 more males than females unemployed. In nonmanufacturing there are nearly two males for every female unemployed as of April, 1987.

Table 24 shows that by major occupational classification, the professional, technical, and managerial personnel accounts for 24.8 percent and structural workers for 19.7 percent of the insured unemployed. These figures reflect plant realignments, company takeovers, and job layoffs. As for the number of weeks unemployed, 54.1 percent were out of work for 1-4 weeks, with another 30.5 percent unemployed for a period of 5-14 weeks. Six hundred thirteen insured unemployed were between the ages of 25 and 34 which represents 29.1 percent of the total unemployed, down 2.3 percentage points from the preceding year. Women for the same age group accounted for 34.6 percent of the total unemployed females.

c). Employment Service Job Openings

A total of 21,208 nonagricultural job openings were received by the New Hampshire Job Service from July 1, 1986 through April 30, 1987. During this same period, the Employment Service placed 9,459 applicants which is a placement ratio of 44.6 percent for the ten month period. Those applicants that were classified as benchworkers and sales persons had the highest placement ratio of 55.9 percent while those in fishing, farming, and forestry were the most difficult to place with a placement ratio of 28.3 percent.
The fifteen specific occupations offering the greatest number of annual job openings by growth are listed below by order of rank.

New Hampshire Nonagricultural Openings
Received and Filled
July 1, 1986 - April 30, 1987

Occupational Category	Nonagricultural Openings Received	Nonagricultural Openings Filled	Percent Filled
Professional, Technical & Managerial	1,086	321	29.6
Clerical	3,774	1,601	42.4
Sales	2,027	1,133	55.9
Services (inc. domestic)	4,215	1,778	42.2
Fish, Farm, Forestry	448	127	28.3
Processing	462	166	35.9
Machine Trades	1,713	755	44.1
Benchwork	1,387	776	55.9
Structural	3,555	1,691	47.6
Miscellaneous	2,541	1,111	43.7
Total	21,208	9,459	44.6

The following table shows the relationship between Active Applicants and Nonagricultural Openings Received for the period of January 1, 1987 through April 30, 1987 in New Hampshire. The professional, technical, and managerial group continues to have the highest applicants per opening ratio with 3.2 percent. The fishing, farming, and forestry group along with the processing group are tied with the lowest ratio of 0.7 percent. The state average at 1.1 percent indicates the difficulty those industries are having at finding qualified workers from the very small group of applicants that are available.

Active Applicants and Nonagricultural Openings Received
for the Quarter Ending April 30, 1987

Occupational Group	Active Applicants	Openings Received	Applicants Per Opening
Professional, Technical & Managerial	1,316	414	3.2
Clerical	1,545	1,408	1.1
Sales	466	469	1.0
Services (inc. domestic)	1,340	1,487	0.9

VIII. ESTIMATES OF NEEDS FOR MANPOWER SERVICES (TABLES 7,14-18)

Manpower services will be of prime importance to unemployed workers, especially the long-term unemployed, those employed part-time for economic reasons, the youth group and the economically disadvantaged.

It is estimated that 89,800 individuals will be unemployed at some time during Fiscal Year 1988 of which 4,340 will by unemployed for fifteen weeks or more. Many of these will need assistance in finding employment. Some may require retraining before reentering the work force. Women make up 44.7 percent of the total unemployed but only 26.7 percent of the long-term unemployed.

During FY 1988 there will be an estimated 106,945 poor persons, a 2.1 percent increase over FY 1987. Individuals less than 18 years old account for approximately 26 percent of the population of the state but 33.5 percent, again in FY 1988, of the economically disadvantaged. The number of cases receiving welfare assistance averaged 18,046 for 1986.

Persons employed part-time for economic reasons are another group that needs special attention. Some of the causes for individuals working on a part-time basis are material shortages, slack work, the inability to find full time work, and lack of transportation to be able to expand their job hunting search. Females comprise 47.5 percent of the total employment while their share of part-time employment rises to 60.6 percent due to the fact that there are more part-time jobs for females than males.

The youth group is usually considered to be the one most in need of manpower services. The following table shows the employment, unemployment, and unemployment rates of the 16-21 year olds that make up the youth group.

New Hampshire Employment and Unemployment
For Youth 16 - 21 Year Olds
November 1986

Area	Labor Force	Employment	Unemployment	Unemployment Rate
New Hampshire	70,010	67,880	2,130	3.0
Belknap	2,660	2,570	90	3.4
Carroll	1,520	1,480	40	2.6
Cheshire	4,430	4,310	120	2.7
Coos	2,200	1,960	240	10.9
Grafton	5,080	4,940	140	2.8
Hillsborough	23,030	22,520	510	2.2
Merrimack	6,570	6,410	160	2.4
Rockingham	13,640	13,180	460	3.4
Strafford	8,840	8,560	280	3.2
Sullivan	2,040	1,950	90	4.4
Balance of State	46,980	45,360	1,620	3.5

Some of the possible causes for the unemployment rates on the chart on the previous page are: the lack of educational levels required, lack of employable skills and experience and little know-how in the details of job search or preparation for job interviews. Assistance is also needed in determining the labor market situations by industry and area together with being furnished information concerning prevailing wage and rate and job requirements. There is a tendency on the part of the youth group to leave and re-enter the labor force more often than the older age groups.

New Hampshire having a greater percentage of rural environment than many other states, has transportation and geographic problems which are accentuated, especially in the northern counties.

EMPLOYMENT SUPPRESSES UNDER 50

GLOSSARY

Annual Average The aggregate of 12 months data divided by 12. Annual Average data are commonly used for projections and other long-term analysis.

Applicant A person who contacts a local office of the Department of Employment Security to seek employment or obtain employability development services.

Average Hourly Earnings Average weekly earnings divided by average weekly hours.

Average Weekly Earnings Average total money earnings of production or non-supervisory workers in the survey week, including overtime, paid vacation and sick leave.

Balance of State New Hampshire minus Hillsborough County.

Benchmark Most economic time series utilize a sample trend made of the best available data at the time. Periodically the series are adjusted due to more complete information being available. This periodic adjustment is a Benchmark Revision and the point-in-time for which the more complete data was available is the Benchmark Date. Data is commonly referenced by their benchmark date, e.g., "data based on a March 1986, benchmark."

Civilian Labor Force See Labor Force.

Consumer Price Index (CPI) This index is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by CPI-U. The CPI is based on prices of food, clothing, shelter and fuels, transportation fares, charges for doctors' and dentists' services, drugs and other goods and services that people buy for day to day living.

Covered Employment Employment in an industry that falls under the coverage of the respective state's unemployment insurance program. In most states presently only agriculture, the self-employed, some employed students, religious organizations, full commissioned salesmen and elected and appointed officials have significant numbers of noncovered workers.

Current Employment Statistics (CES) Estimates of nonagricultural wage and salary employment and production workers hours and earnings by industry. CES produces these estimates monthly for each state and MSA from a sample of employing establishments in cooperation with the Bureau of Labor Statistics.

Current Population Survey (CPS) A monthly household survey of the population of the United States. This survey of 60,000 households is the data source for the national estimates of labor force composition. Some CPS data is also incorporated into the state and area labor force estimating procedures to improve interstate comparability.

Definitions - (1) Manchester MSA: city of Manchester and the towns of Allenstown, Auburn, Bedford, Candia, Goffstown and Hooksett.

(2) Nashua PMSA: city of Nashua and the towns of Amherst, Brookline, Hollis, Hudson, Litchfield, Londonderry, Merrimack, Milford, Mont Vernon and Wilton.

(3) Portsmouth-Dover-Rochester MSA: cities of Dover, Portsmouth, Rochester and Somersworth and the towns of Barrington, Durham, Exeter, Farmington, Greenland, Hampton, Lee, Madbury, Milton, New Castle, Newfields, Newington, Newmarket, North Hampton, Rollingsford, Rye and Stratham, Maine Portion - Berwick, Eliot, Kittery, N. Berwick, S. Berwick, Wells, York and Ogunquit

(4) N.H. Portion of Lawrence-Haverhill PMSA: towns of Atkinson, Brentwood, Danville, Derry, East Kingston, Hampstead, Kingston, Newton, Plaistow, Salem, Sandown, Seabrook and Windham.

Note: MSA represents Metropolitan Statistical Area and PMSA represents Primary Metropolitan Statistical Area.

Discouraged Worker Persons who want to work but made no attempt to find work in the past four weeks because of a belief that they could not find employment. Discouraged workers are not counted among the unemployed.

DOT Codes An occupational coding structure based upon job traits and relationships. The codes are published in the Dictionary of Occupational Titles.

Economically Disadvantaged An individual whose immediate family either receives cash welfare payments or whose annual income falls below the current Poverty Income Guidelines.

Educational Attainment Highest grade of school completed.

Employment by Place of Residence An estimate of the number of persons employed who live within a given labor market or other geographic area. All persons who worked for pay and unpaid family workers who worked at least 15 hours or more in the survey week are included, as are workers who were temporarily absent from their job due to vacations, labor disputes, etc.

Employment by Place of Work An estimate of the number of jobs filled in the survey week within a given area. Multiple job holders are counted for each job. In most states only the nonagricultural wage and salary workers are tallied by place of work. Labor disputants are not included in the estimates of employment by place of work.

Employment Security Automated Reporting System (ESARS) A computerized tally of all Job Service activities, job applicant and job openings characteristics.

Entry Level Job A beginning job that requires little or no experience, but may require a minimum amount of training or education for a specific position.

Hard-to-Fill Job Openings Job openings which have gone unfilled for a month or more. Some of the openings may be difficult to fill because of the job environment, wage scales or lack of qualified workers.

Hard-to-Place Applicant An applicant who is unable to be placed in a job due to (1) a lack of demand or (2) a lack of qualifications for a particular job.

High Demand Occupation Occupations which have a substantial number of job openings both in absolute terms and relative to the number of job applicants for that occupation. High demand may be the result of either high growth, high turnover and sometimes by a combination of the two.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture or origin regardless of race.

Index or Index Number A measure of relative growth compared with a base figure of the same time series. In index form the base period is set equal to 100, and data for other periods are expressed as percentages of the base value. Plural is indices.

Insured Unemployment A count of persons who have filed claims for state unemployment insurance benefits.

Insured Unemployment Rate An administrative tool which is the ratio of insured unemployment to covered employment lagged about 6-9 months.

Job Bank A computerized system which provides rapid dissemination of job orders throughout a network of Employment Division local offices.

Job Corps A national system of 60 residential centers in 31 states and Puerto Rico providing basic education, vocational training, counseling, health care, and other services to help disadvantaged young men and women, age 16 through 21, prepare for jobs and responsible citizenship.

Job Training Partnership Act (JTPA) An act which replaced the Comprehensive Employment and Training Act on 10/1/83. This act provides a new program and delivery system to train economically disadvantaged persons and others for permanent private sector employment. The training programs are administered by the State and planned and carried out through a partnership between the private sector and government at the local level. Programs include adult and youth training, training and placement assistance for dislocated workers and federal administered activities including programs for Native Americans, migrant and seasonal farm workers, veterans, labor market information, Job Corps and other national activities.

Labor Force All persons 16 years and older who are either employed or unemployed. Normally published as a civilian labor force by place of residence (See Employment by Residence).

Labor Market Area An area with a central community and economic concentration in which workers can generally change jobs without changing their residence. In most states labor market areas are either counties or groups of counties.

Labor Market Information (LMI) Data on a broad range of topics such as labor force, employment by industry and occupation, unemployment, population, earnings, wages, hours worked, training programs and labor turnover.

Metropolitan Statistical Area: A grouping of cities and towns with a total population of at least 75,000 or a central city of at least 50,000 with an urbanized area of at least 50,000 inhabitants.

Minority Group All races other than white, and the Spanish-American ethnic group.

Multiple Job Holders Persons who simultaneously work more than one job.

Nonagricultural Wage and Salary Employment Place of work employment that does not include the self-employed, unpaid family workers, domestics or agricultural workers. Conceptually this is probably the most consistent economic time series available to compare different labor markets over an extended period of time.

Non White Group All persons who identified themselves as Negro, American Indian, Chinese, Japanese, Filipino, Korean, or other races in response to survey or census questions.

Occupational Employment Statistics (OES) A program which produces occupational data for major industries once every three years. Projections by occupation are made which aid educators and other occupational planners.

Part-time Work Work that is less than 35 hours per week.

Per Capita Income Total personal income divided by total population.

Personal Income, Total Private and government wage and salary payments in cash and in kind, other labor income, farm and nonfarm proprietors' income, interest, net rents, dividends and transfer payments, less personal contributions for social insurance. It is measured before the deduction of personal income and other personal taxes. Dollars are not adjusted for change in consumer price index.

Primary Metropolitan Statistical Area: A large urbanized county or group of counties with socio-economic ties and at least one of these counties has a population of more than 100,000.

Qualified Applicant An applicant who meets education, experience, and performance standards for a job opening. These standards are set by the employer.

Seasonal Adjustments Minimizes the changes in any time series from normal annual occurrences, such as Christmas, summer vacations and weather. After seasonal adjustment any month can be compared with the annual average, or any other month and differences should then be due to economic trends or unusual occurrences. Seasonally adjusted data more accurately portrays underlying economic trends, but should not be used where the current level is more important to the data user than the economic trend. No meaningful seasonal adjustment exists for annual or annual average data since the purpose is to make monthly or quarterly data comparable to the annual average data.

SIC Codes Standard Industrial Classification code structure in which all establishments are classified by a four-digit code according to their primary economic activity. Frequently references will be made to SIC codes at the 1, 2, or 3 digit levels when a less specific classification is useful.

Survey Week The week that includes the 12th of the month is used as a reference period for most labor force data.

Time Series A set of consistent economic quantitative data collected at periodic intervals (most labor market information is monthly, but weekly and annual data is published for some items).

Total Employment A count of persons, residing in an area, who worked for pay or profit during the reference week including the 12th of the month or had a job from which they were temporarily absent because of illness, vacation, labor dispute, or other reasons not reflecting a shortage of work, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

Total Unemployment A count of persons, residing in an area, who did no work at all during the reference week including the 12th of the month, but were seeking work or awaiting recall from layoffs or the beginning of a new job within the next 30 days. This count includes persons receiving unemployment insurance benefits, those who have delayed filing for benefits but were eligible to receive them, those unemployed who have applied for benefits but were not eligible to receive them, unemployed workers who exhausted benefits in the current benefit year, unemployed workers from industries not covered by unemployed insurance and unemployed persons newly entering or reentering the labor force.

Types of Unemployment

Frictional - Unemployment that is frictional in nature i.e., short-term unemployment encountered in searching for a job, or from a temporary layoff.

Structural - Unemployment that is structural in nature i.e., mismatch between the skill requirements or existing job openings and the skills possessed by the current unemployed.

Cyclical - Unemployment that is cyclical in nature i.e., deficiencies in aggregate demand exist resulting in a level of labor demand that falls short of the available supply of workers.

Underemployment A term that includes both persons who are working part-time who would prefer full-time work, and persons working full-time in an occupation which does not utilize their skills derived from prior training or experience.

Unemployment Persons who were not employed during the monthly survey week but were available for work and had either (1) overtly engaged in a job seeking activity within the four week period up to and including the survey week; (2) were waiting to be recalled from a layoff; or (3) were waiting to report to a new wage and salary job within 30 days.

Unemployment Rate The number of unemployed persons expressed as a percentage of the labor force. Commonly the seasonally adjusted unemployment rate is referred to as the unemployment rate and it is usually the only rate quoted in the monthly news release on the U.S. unemployment situation (see Seasonal Adjustment.

Urbanized Area A geographical area where the population density is at least 1,000 persons per square mile.

Vietnam Era Veteran (VEV) Any person who served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released with other than a dishonorable discharge; or was discharged or released from activity duty for a service-connected disability if any part of such duty was performed between these dates.

Work Incentive Program (WIN) Counseling, training, job development and supportive services are provided to employable recipients of Aid-to-Families-with-Dependent-Children (AFDC). The object is to place AFDC recipients into suitable employment.
